

Adams

A wide range of tubing, hoses, connectors, rotating joints and adaptors, swivels, nipples, bushings and tubing clips etc is available.

Most Lubrication Systems now use metric tubing in sizes 4, 6, 8, 10 and 12mm \varnothing .

All Tubing used must be compatible with the type of system it is intended for, i.e. pressure, temperature and type of lubricant must be considered.

□ Fittings and Accessories

Tubing & Hoses - For sizes not shown below please ask

NYLON TUBE: Nylon (Polymide) Type 12, Fully Plasticised and Light Stabilised.
Metric Tube meets the requirement of Din 73378 and BS 5409

Max Working Pressure @ 20°C

Colour - Natural

Part No.	O/D	I/D	Max Pressure
40 1002 02	4	2.5	28

100291200	12	50.4	30	M24x1.5	15
100291400	14				

Fitting is supplied with two locknuts.
Additional locknuts must be ordered separately.
Connectors will accommodate
up to 15 mm thickness of bulkhead according to model.

Anti-Vibration Mountings

Part No.	A	B	C	D
LV 10468	20	20	M6	15
LV 10568	30		M8	20

There are four of these to a set and they come complete with nuts and washers.

Bolts are threaded to within 2 pitches of the metal plates.

It is recommended that in applications where vibrations are present the above mountings should be used.

Anti-Vibration Plate

A heavily ribbed rubber plate material used to reduce vibration between combined pump / timers and machine base.

Dimensions are for mounting bracket on oil reservoir.

Four sizes available to suit 1.2 Lt, 2.0 Lt, 3.0 Lt and 5.0 Lt Reservoirs.

Part No.	A	B	C	D	To Suit Res. Capacity	No. of Holes
